SUSTAINABILITY IN SCHOOLS -CLIMATE ACTION PLANS

The Government has tasked all schools with creating a climate action plan which aims to improve climate education, achieve net zero emissions, build resilience to climate change, and enhance the environment.

Currently our school is working on reducing its energy use through switching off lights and devices when not in use. We are also looking to reduce food waste and we now have separate bins for children to use for the food waste they have.

We look forward to letting you know about other things we are focusing on later in the year!
